## Project description

The Thompson and Cariboo Regions have a considerable concentration of electrical transmission lines and pipelines because of their central location in the Provincial grid. Yoke plate 5 can be replaced by yoke plate 53 for three-conductor phase bundles FIG.

## Public perceptions of electric power transmission lines

That saved us millions of dollars.

## Project description

There are two significant variations of the delta pylon; one has longer side crossbars such that all three bundles of conductors are suspended on V-shaped.

## BC Hydro

An area of 15 metres around transmission towers should be kept clear of shrubs to permit Hydro One access to towers.

## High

Hampton: I'm told that Hydro One is in the top 2% of the Ministry of Labour's list of high-risk firms with respect to health and safety. The cost of purchasing replacement feed for this period is paid as compensation. Most of this land can still be used for agricultural production see Chapter Two.

## Secondary Land Uses

It is an extensive plateau which would be used for improved pasture for beef production were it not for the high cost of land clearing. My community is probably one of the fastest-growing communities in the province.

### **Secondary Land Uses**

Hampton: One of the things I hear from people who work on the transmission and distribution systems is that this can be very dangerous work. Those particular issues would normally be included in the integrated system plan. Peterson: From a northern perspective, the cost of generating and producing energy in northern Ontario, as I say and as Mr.
