A further dilemma surrounds the doctrine of divine providence. As scholars have rediscovered his thought and have made his corpus available to a modern audience, Gersonides is once again appreciated as an insightful, ruthlessly consistent philosopher. God knows individual persons, for example, only through knowing the species humanity.

Sharon Portnoff, Not in Our Stars

His predecessor Maimonides had claimed that no valid inference can be drawn from the nature of the sublunar sphere to that of the superlunar sphere.

Levi ben Gerson was born in 1288 in Provence and may have lived for a time in Bagnol sur-Ceze. More explicitly, the heavenly bodies are designed for the benefit of sublunar existence, and they guarantee the perpetuation of life on earth. The Black Death, which arrived in Europe in 1347, was thus provided with numerous astrological credentials.
