All of the buckling modes are classified into two deformation phases. He was a visiting Associate Professor in Mechanical Engineering Department at LSU in 1977, and worked in LSU-NASA Space Shuttle team project in Manned Space-craft Center in Houston from 1970 to 1973.

As a result of this, different buckling modes are obtained depending on the inter-tube separation  $d$  as well as the number of constituent tubes  $N$  and the innermost tube diameter.
