The Experience of Being Listened To: A Qualitative Study of Older Adults in Long

Linked together, a unified description of being listened to is constructed: The experience of being listened to is the nurturing contentment of vital genuine connections while deference triumphs mediocrity.

Nurses reflections about dementia care, the patients, the care and themselves in their daily caregiving

The agent of change is the individual patient. The nurses felt that they had been able to convey consolation when they saw that their efforts had helped patients to experience a good, peaceful and harmonious death.

Analysis and Evaluation of Jean Watsons Theory of Caring Essay

Awareness of the outside change leads to a confusing or neutral period. Initiating and engaging in conversations about how patients experienced their situation proved to be an important means to alleviate their spiritual and existential suffering.
