Conservation Practices

The Handbook describes a range of conservation practices and key resources for use on organic operations — some the same in conventional operations, some different -- such as nutrient management, crop rotations, livestock grazing and pest management. Cool roofs reflect the sun? These documents are the foundation of what is in FOTG, but all of these may be edited at the local level.

Conservation Network Planning

You must have the conservation practice standard developed by the state in which you are working to insure that you meet all state and local criteria, which may be more restrictive than national criteria. Check out these simple energy saving tips to help keep your energy cost down.

Center for Environmental Excellence by AASHTO: Center Products & Programs

The Background Briefing section describes the legal framework for Section 7 consultation as defined in the ESA itself and in regulations issued by the U.

Recreation Planning Resources

February is no exception--we have a wide range of virtual training offerings on such topics as: Level One Leadership: Design Your Leadership Journey, Conservation and Hunting in America, Transitioning Back to the Office, and Modeling for Endangered Species Management. This new handbook provides this critical information to our conservation planners and other ag-professionals who design practices for farmers and ranchers. The requirement for an American Society of Agricultural and Biological Engineers standard ASABE S612 Type 2 energy audit has been revised to allow other assessment methods.

Recreation Planning Resources

Modified the standard to provide clarity to some requirements. This would improve, maintain and protect the natural environment and its resources for the benefit of all mankind. Network diagrams are flow charts of direct, indirect and cumulative effects resulting from installation of the practices.

Tools

NRCS will post all comments on. Grassed Waterway Code 412 : Minor revisions were made for clarity and readability purposes. Presents a vision for the housing industry that includes improving the energy performance of existing homes and decreasing energy use by an average of 30 percent in at least 50 million existing homes by 2010.
