Math 405: Introduction to Real Analysis

It contains, besides the standard calculus theorems, a very nice introduction to topology of the real line through the study of continuous functions. Even if it's just to make a joke see the cornball pic in chapter one showing a Dedekind cut,ugh. It is meant as a last course in real analysis for those intending to go into teaching, giving them that necessary layer of knowledge above calculus so that they can teach calculus well and with confidence.
