## Diarrheal Diseases

Jamison DT, Feachem RG, Makgoba MW, et al. The authors predicted that 21. However, the WTO in 2006 granted developing countries a 10-year waiver to manufacture generic drugs using the intellectual property rights of big pharmaceutical companies overseas.

## African Health Stats

Subnational areas in countries such as Botswana, Rwanda, and Ethiopia recorded some of the largest decreases in child mortality rates since 2000, positioning them well to achieve SDG targets by 2030 or earlier.

## A comparative review of mobile health and electronic health utilization in sub

Journal of Diarrhoeal Diseases Research. The diarrhea mortality burden among children under five in Sub-Saharan Africa reveals the persistent magnitude of this preventable and treatable disease in the region. In Sub-Saharan Africa, few prospective studies lasting at least one year report sex differences at the community level.

## African Health Stats

Twenty-four studies were identified that met the above criteria and were therefore included in this review.

## A comparative review of mobile health and electronic health utilization in sub

Enteropathogens, such as rotavirus, entero-adherent pathogenic Escherichia coli EAEC, and enterotoxigenic Escherichia coli ETEC, have been identified as important pathogens in diarrheal diseases, and rotavirus, which causes severe complications of diarrhea, has been found to be the most prominent cause of death in the world ; ;.
