Finally, further reflections on conjunction and disjunction in the weak Kleene logics accompany this paper, particularly concerning their relation with containment logics. This means that Carnap's A-continuum and Reichenbach's rule of enumerative induction as its special case incorporates a Principle of Inductive Simplicity only in a weak sense: Some inferences to the simplest unrefuted hypothesis are ruled out a priori. The same observation holds of such information-theoretic measures of aesthetic value as redundancy R per entropy H , i .
