AES E

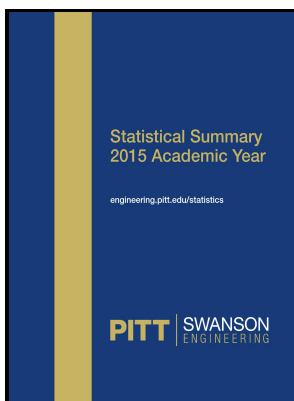

Patent 2,195,362, March 26, 1940; appl. However, these epoxy resin systems require higher cure temperatures because their very rigidity reduces the molecular mobility needed to properly position two reactive end groups for reaction. Dieffendorf and Tokarsky have also shown that the amplitude and wavelength of the ribbons vary from the center of the fibers to the surface, the more highly oriented ribbons being closest to the fiber surface.
