McAfee Executive Briefing Center

The economy has gained more than three million jobs since the President took office—the most jobs created in the first five months of any presidency in modern history. That increases the of the new bank extending you credit. The level of complexity, sophistication and funding needed for this attack suggests the actors were most likely state-sponsored.

[Briefing #75] Internet governance in May 2021

Description The increasing ubiquity of the internet of things has put a new focus on data privacy.

Should employers pay for home internet during remote work?

That locks some people out of jobs, and it makes it harder for people to move between states—particularly burdening military spouses, of whom work in a field requiring a license and are subject to military-directed moves every few years. In law school we often joke that lawyers fear math; students of our profile who like math went to business school. In other words, net neutrality rules are prophylactic.

Executive Briefing: Data privacy in the age of the internet of things: Big data conference & machine learning training

American farmers and ranchers are also getting squeezed by foreign corporations importing meat from overseas with labels that mislead customers about its origin. Prioritization helps alleviate congestion when more information packets arrive at a network node than that node can handle.
