## The role of land use planning in sustainable rural systems

This habitually involved transporting people of African descent from the peripheries of urban centers into the inner cities. Decisions on infrastructure investment will be made on the basis of multiple criterion evaluation, to best meet the sometimes conflicting policy goals and objectives.

## Flying taxis could transform our cities if we set the right rules

This requires the formulation of broad goals, and translating them into specific measurable objectives relating to particular modes of transport.

## Integrated Land Use

Thus, they can examine how different land use policies might affect transportation-system outcomes traffic volumes, congestion levels, pollutant emissions, transit ridership.

## Integrating Land Use and Transportation Planning through Placemaking

This is a method which incentivizes enhancement of density by consolidating small plots with larger plots.
