## Mysteries of the Hopewell: Astronomers, Geometers, and Magicians of the Eastern Woodlands. (Book Review).

The search for rank in prehistoric burials.

### Back Matter on JSTOR

William Romain received his Ph. As with most other large geometric earthworks, very little of the original earthwork can be recognized by the naked eye at ground level due to the effects of agricultural plowing and erosion.

### Hopewell Archaeology: A View from the Northern Woodlands

Since the 1992 legislation, a primary management objective at Hopewell Culture NHP has been land acquisition at Hopewell Mound Group, High Bank Works, Seip Earthworks, and Hopeton Works. From Zeppelin in Germany to Goodyear in Akron, Ohio, Arnstein participated in the design and development of more airships than any other engineer. Thus, many of these earthwork sites have hidden discoveries waiting to be revealed by modern investigators and LiDAR imagery represents one avenue for re-examining these monumental sites.

### Performing Serpent Mound: A Trans

Akron: University of Akron Press.

## Mysteries of the Hopewell: Astronomers, Geometers, and Magicians of the Eastern Woodlands. (Book Review).

Unfortunately, this eyesore blocks any view of the alignment of this earthwork to the summer solstice sunset through its diagonal axis Romain 2005:3A-9--3A-10. TANKERSLEY Department of Archaeology Cleveland Museum of Natural History Cleveland, OH 44106 and Department of Art and Anthropology Augustana College Sioux Falls, SD 57197. He could have been a philosopher or mathematician, but a desire to be practical attracted Arnstein to civil engineering.

## **Mysteries of the Hopewell: Astronomers, Geometers, and Magicians of the Eastern Woodlands. (Book Review).**

Further light on carbon isotopes and Hopewell agriculture. Black Leaf is exquisite poetry of subtle and ironic commitment, steeped in a love and respect for language. In Twelfth Annual Report of the Bureau of American Ethnology.

### **of the Hopewell: Astronomers, Geometers, and Magicians of by William F. Romain**

Within the Great Enclosure there were at least 40 mounds ranging in size from small and inconspicuous conical mounds only a foot or two high to large and massive loaf-shaped mounds the exact number is impossible to know because various forms of degradation and destruction have taken place at the site, beginning with the Squier and Davis excavations. Modern themes of national importance play throughout the story of the Scioto Marsh.
