Mental retardation types, severity, causes, symptoms, diagnosis & treatment

Risk factors are related to the causes. . The family physician is a valuable resource in periodically reviewing the recurrence risk for the family.

Alonzo G. Grace

The district court, however, has misconstrued Rowley. Other children may have a small deletion or duplication of a particular chromosome that is rarely reported; thus, the phenotype is still undetermined.

Social cognitive development with moderately and severely retarded children

The physician needs to explain to the parents what these findings are and the reasons for further evaluation. A report of March 13, 1987 by Dr. The systems review of the child should be complete, with special attention to growth problems, history of seizures, lethargy and episodic vomiting.

Mentally Retarded Children: Types, Characteristics & Treatment

The Act was a response to tomes of testimony and evidence that handicapped children were being systematically excluded from education outright, or were receiving grossly inadequate education. Infants suffering from congenital hyperthyroidism are also at the risk of poor brain development.

disability history museum

In Contra Costa County Consortium, 1985-1986 EHLR Education for the Handicapped Law Report DEC. Individuals with moderate mental retardation can take care of themselves, travel to familiar places in their community, and learn basic skills related to safety and health. It is they who continue to talk about individuals incapable of responding to either education or rehabilitation, who stress disability rather than potential, who make their low expectations into self-fulfilling prophecies, who recommend policies that are exclusive rather than inclusive, denying access to programs because they presume the applicant to be incapable of sufficient progress.

Mentally Retarded Children: Types, Characteristics & Treatment

. In *School District of the Menomonee Area v. The National Association for Retarded Citizens* recognized the seriousness of this situation and issued a strong Resolution in support of a developmental approach which is firmly based on the knowledge, not just the belief, that there is no human being who does not possess the capacity to grow and develop.
