The Robbers Cave Experiment: Intergroup Conflict and Cooperation

A major step toward creating a dialogue among disciplines, the book will enable every social scientist to understand more clearly the current state and future direction of interdisciplinary relationships and their indispensable future in social scientific thought by Muzafer Sherif Book 38 editions published between 1426 and 1969 in 4 languages and held by 782 WorldCat member libraries worldwide Events at the place force Eadlyn to make an important--and impossible--choice, knowing that her Selection might not lead her to the fairytale ending her parents found twenty years ago. Almost all the boys gathered around the faucet to try to clear it. Here he collaborated with on The Psychology of Ego-Involvements, which was later published in 1947.

Interdisciplinary Relationships in the Social Sciences

It was found that the relationship between levels of alcohol consumption and perceptions and warning-label effectiveness to be insignificant; and that health consciousness to be ineffective in predicting perceptions of label effectiveness. The Robbers Cave experiments showed that superordinate goals goals so large that it requires more than one group to achieve the goal reduced conflict significantly more effectively than other strategies e.

When the groups interacted with antithetical goals, they formed negative stereotypes of each other and gave vent to hostility and aggression in many forms.

Some Contributions of Muzafer Sherif to Sociology

Publication Quality vs Volume Sherif begins by describing that at the time of publication was undergoing an increase in the amount of research taking place, and publications printed. In 1966 he and his wife moved to , where she became a member of the Psychology Department and he became a Sociology Professor. Accuracy The extensive amount of information and details about the theory on this web site shows that a considerable amount of research has been conducted, thus providing accuracy and validity.

Social Judgment and Intergroup Relations by Donald Granberg, Gian Sarup

Though the selections range over a broad spectrum each is characterized by the precise and incisive work techniques Sherif devised as well as by its intrinsic relevance to significant issues. The prejudice was initially only verbally expressed, such as through taunting or name calling, but as the competition progressed, the prejudice began being expressed more directly, such as with one group burning the other's flag or ransacking their cabin.
