Zoology Books for IAS

Different shapes such as rounds, kechis, baroques and mabes can be produced from the same oyster by inserting nuclei of various shapes.

ECONOMIC ZOOLOGY

India is still being regarded as the principal lac producing country of the world.

Economic Zoology

In France was a key figure.

Browse subject: Zoology, Economic. from old catalog

Sex can be determined by the shape of the genital papilla which is pointed in male and oval in female. Turbellarians also have an osmoregulatory system called the protonephridium. Males are haploid n and develop from unfertilized eggs.

Exotic Species

. They are also eaten by birds in large numbers. Insect ecology varies from place to place and sometimes the species found on a corpse are not native to the place where the corpse is found.

Turbellarians

Phospholipase A through indirect action on the unsaturated fatty acids causes hemolysis of red blood cells. Aquatic leeches, particularly *Limnatis nilotica*, may enter the body in drinking water.
