Understanding the World Around Us

Click to get the step-by-step.

Science

You need only a small amount, though, so check the bulk food section. Kids can make their own version from a mason jar, then use it to gather ants or other small insects and observe them in action.

Common Misconceptions About Science I: “Scientific Proof”

Get the fun and yucky instructions at. All you need is a plastic bottle, a ruler, and a permanent marker to make your own rain gauge. Can they sniff out the fish oil over the garlic cloves? Give your nature walk more direction by giving students specific items to seek out.

The Natural World

I store most of my materials in. She has found out that we start to imitate facial expressions, posture and even tone of voice of those we spend a lot of time with.
