

Dating recent surface processes using cosmic ray generated ^3He in rocks.

University of Manchester - Surface exposure dating

Description: -

-Dating recent surface processes using cosmic ray generated ^3He in rocks.

-Dating recent surface processes using cosmic ray generated ^3He in rocks.

Notes: Thesis (Ph.D.) - University of Manchester, Department of Earth Sciences.

This edition was published in 1996

Cosmic ray exposure dating on the large landslide of Séchillienne (Western Alps): A synthesis to constrain slope evolution

South of Sierra Chica de Zonda, the thrust seems to disappear and to be relayed by the Sierra de Pedernal anticline, which can most probably be interpreted as a fault-propagation fold. Belz Zenithal dependence of muon intensity M.

Using Cosmogenic ^{10}Be Dating to Unravel the Antiquity of a Rocky Shore Platform on the West Coast of Korea

One sample Plag 10 contains excess ^{40}Ar interpreted to result from implantation of parentless ^{40}Ar together with solar wind while exposed on the lunar surface.

Cosmic ray labeling of erosion surfaces: in situ nuclide production rates and erosion models

Sushch FACT — Influence of SiPM Crosstalk on the Performance of an Operating Cherenkov Telescope J. Valtonen Solar energetic particle events related to disk-centre full-halo coronal mass ejections E. Moiseev New concepts of timing calibration systems for large-scale Cherenkov arrays in astroparticle physics experiments B.

Cosmic ray labeling of erosion surfaces: in situ nuclide production rates and erosion models

The principle of faunal succession states that different fossil species always appear and disappear in the same order, and that once a fossil species goes extinct, it disappears and cannot reappear in younger rocks Figure 4. Prior to our study, the crystallization and metamorphic ages on this trench regolith sample were unknown Meyer.
