## Book of the Year Awards 2006

Consequently, few evidence based changes in practice have materialized. Journal of Nursing Administration, 39 9 , 382-387.

## Capturing and Evaluating Process Semantics from Front

The first problem is the difficulty of obtaining semantics that describe front-line processes from nurses who actually do the work.

## Effect of Implementing Discharge Readiness Assessment in Adult Medical

Surgical closure of the puncture site has to be done if the conservative techniques fail. A Thumbnail Sketch of Theatre Nursing Macmillan Education UK 1983 978-0-333-35770-5, 978-1-349-17237-5 Peter Aggleton, Helen Chalmers auth. Retrieved 12 May, 2011, from SemanticWeb 2013.

## Improving Patient Outcomes with Relationship

Often parents will wrongly feel that their child is cross-eyed for this reason. As you will soon see, SiteSell. Peplau RN, BA, MA, EdD auth.

## Improving Patient Outcomes with Relationship

The Kelowna Puffers Club Kelowna boasts a warm, dry climate which has long attracted both people of retirement age and those with respiratory dysfunction. Chinese patients in downtown Toronto s Mount Sinai Hospital are being brought Chinese meals as part of the hospital s effort to cater to the needs of members of an ethnic community. Hospitals use a broad range of strategies for readmission avoidance that they customize to their organizational structure and culture.

## Data Buku Nurse / Nursing Books 5

Nurses use graphs to construct their process domain, and in doing so, capture semantics, entities and relationships that comprise process knowledge. Partial funding for the workshop as a project intended to facilitate the development of health care research and improve its quality, rather than to serve as a forum for the sharing of existing information, was received from the federal government's National Health Research and Development Program.
