## Marinet

The launders may be positioned 39 40 Clarifier Design, Second Edition inboard along the outside wall, outboard along the outside wall, or at an intermediate location away from the outside wall.

## Water quality

In both the Sibony 1981 and Young and Edwards 2000 works, the difference in performance between sand sizes was not great. First, it is incorporated to floc particles, which dramatically increases the specific gravity and settling velocity of floc particles.

## South Humberbank salinity research project

It is here that the Herring spawn in the coarse sand and shell sea-bed, yet this important environmentally sensitive area has never been designated as such.
