Frontiers

In fact, the pure logic and tools necessary to understand mathematics is art in and of itself. Netrins are proteins that direct axon extension and cell migration during neural development, with studies showing interactions between netrins and robo family receptors.

Music and the Brain: What Happens When You're Listening to Music

Music has proven to be positive for development and as a joint activity.

The Fine Art of Listening: for Musicians & Audiences

The only research method available was to have people listen to sounds and describe what they heard.

Music as an effective social skill tool

Knowledge that was already in place but awaiting his tuning to that resonance. Brains of musicians also show functional differences from those of non-musicians.
