## Guidelines for Phase I, II, and III Archaeological Investigations and Technical Report Preparation

Maps: Include the location of all identified sites on USGS quadrangle. Signed copy of Cultural Resources Files and Library User Registration and Research Record Form. All profiles should have a north arrow, scale and key.

### Secretary's Standards

But the Father of Archaeology is William Flinders Petrie 10. Human bodies laid to rest in graves, either from existing cultures or past ones, are increasingly being challenged by those who feel their ancestors are being disturbed or disrespected. If large areas were exposed through plowzone removal, indicate the amount of area in square meters; 5.

### Digital Archives in Archaeology

Consistency with previously employed area sampling frameworks also improves potential replication in terms of later locating sampled and unsampled areas. It also differs in that this area studies fossils of extinct species and not humans or human ancestors. These guidelines represent minimum standards and do not preclude innovative strategies.

### Secretary's Standards

Comments or Questions about our site? Section 106 and Cultural Resource Investigations Pg. Data Recovery Plan The data recovery plan must include an overview of previous investigations that were conducted for the archaeological resource s in question.

### DAACS

Digital Antiquity extends our knowledge of the human past and improves the management of our cultural heritage by permanently preserving digital archaeological data and supporting their discovery, access, and reuse.

## Guidelines for Phase I, II, and III Archaeological Investigations and Technical Report Preparation

Explicit descriptive statements of and justification for field study techniques are important to provide a means of evaluating results. Arguably, this period is also the birth of genealogy and a sense of cherishing previous generations. Historic and prehistoric properties may be important for the data they contain, or because of their association with important persons, events, or processes, or because they represent architectural or artistic values, or for other reasons.

### **Guides to Good Practice: Main**

Include the following information: a. Plowzone removal may be conducted in areas that were subject to previous cultivation practices and that exhibit a definable plowzone. Phase I fieldwork consists of a number of methods including pedestrian survey, excavation of shovel test probes, remote sensing, and deep testing of appropriate landscapes.
