APEC Energy Resiliency Principle and Energy Access Paper were endorsed by EWG at its 59th meeting in August 2020. The Neutrality Hypothesis with the existence of energy efficiency: According to this hypothesis definition, energy conservation does not affect growth, and these two magnitudes do not appear as being related to each other. In the United States, existing fiscal policies are often unfavorable to investments in end-use efficiency.

Keep It Moving?

Third, the required rate of capital recovery for an investment in energy-saving equipment—the payback period—is approximately 2 years.

Distributed Energy Resources (DER) Connections Review

The mandate was renewed again at COP12 through Resolution 12. The Roadmap represents the most action-oriented, ambitious and substantive planning process that Colorado has ever undertaken on climate leadership, pollution reduction and a clean energy transition. The existence of contracts and franchises meant that distribution companies did not appear to need to fear the consequences if CCGTs they bought turned out a little more expensive than the alternative namely purchasing power from National Power or PowerGen, probably based on use of existing power stations burning British coal.
