Infertility and Identity New Strategies for Treatment

After couples with infertility undergo testing, about 40 percent of the cases are found to stem from female factors and another 40 percent from male factors. However, there was a lack of evidence on any long-term outcomes. Sometimes a tubal ligation or vasectomy can be surgically reversed.

Potential new strategies for the treatment of ovarian infertility and degenerative diseases with autologous ovarian stem cells

If you have a history of depression or anxiety disorder, you're at increased risk of these problems recurring in the months after your child's birth. The resulting embryos are then transferred into the woman's uterus through the cervix. Routes to Creating a Family Besides medical treatment, what options do we have? Many of these multiple births can be prevented.

Questions and Answers about Infertility and its Treatment

The donor relinquishes all parental rights to any resulting offspring. A slight, sustained rise in temperature is an indirect indication that ovulation has occurred. You need to put your needs first.
