The project, by studying what is occurring within and under the wetland ponds, will enable researchers to better understand the workings of the treatment process and the variables affecting it.

Water Resources

Access to wetlands with primary treated wastewater would likely be restricted for humans and most animals. Recycling this water could represent a significant savings to the dairy. Groundwater depletion has been a concern in the Southwest and High Plains for many years, but increased demands on our groundwater resources have overstressed aquifers in many areas of the Nation, not just in arid regions.

Water Facts

The feasibility of creating wetlands in such soil conditions and the ability of the wetlands to rebound after flooding is being tested at this site.

Activities of the Water Resources Division in Arizona, 1986

Federal Noxious Weed Act P.

The fight to stop Nestlé from taking America's water to sell in plastic bottles

Each of these agencies has a different mission that is reflected in the implementation of the agency's authority for wetland protection. People settling in such areas might decide to install wetlands.

Arizona Project WET

More work needs to be done. The Administration's proposals mix measures that tighten restrictions on activities affecting wetlands in some cases and relax restrictions in other areas.
