### Data resource profile: The korea national health and nutrition examination survey (KNHANES) — Seoul National University College of Medicine

In terms of grams of food, the percentage of plant-food intake decreased consistently, from 97% in 1969 to 79% in 1995. All estimates are based on modelled estimates for 2020. However, there have been few studies conducted on total fat and fatty acid intake among young children in Asian countries.

### North Korea

From our study, we also found the result showing gender difference. You should seek the advice of your physician or other qualified health provider with any questions you may have regarding a medical condition.

### Global Health & Nutrition Resources

The prevalence of undernourishment PoU is defined as the proportion of the population whose habitual food consumption is insufficient to provide the dietary energy levels required to maintain a normal active and healthy life. Make 1,500 Milligrams Your Daily Sodium Budget This 2-page handout describes ways to cut back on salt, from the Dept. The government maintains strict control over tourism

### nutrition transition in South Korea

Notes: Percentage % of population using each drinking water source, based on modelled estimates up to 2017. J Am Coll Cardiol 2010;56:1113—32.
