## The Changing Population Distribution of England and Wales, 1961

Traditionally, most Koreans had engaged in agriculture.

## Population Change and Development in Korea

Another result of the war was a baby boom that brought about an annual rate of natural population growth of 3%, the highest in the history of Korea. Underpopulation is usually defined as a state in which a country's population has declined too much to support its current economic system. In the 1960s, a massive flight of farmers to cities was caused mainly by poverty in rural areas, and the proportion of the urban population increased from 28% to 41% between 1960 and 1970.

## Changes in Population Structure by Mother Tongue in East Serbia in the Last Century

The data suggest in 2006, 50 people owned one of the limited number of older model properties in the area but by 2011 that number had fallen to 40. In October 2015, the owner of the No Frills formerly located on Sherbourne Street reopened a new store two blocks away at the Greenwin Plaza shopping centre located at 345 Bloor Street East.

## Population

In the United States the labor force participation of men has been falling since the late 1960s.
