## Growth, characterization, and properties of ultrathin magnetic films and multilayers : symposium held April 25

Preliminary results from screening in lung adenocarcinoma cell lines A549, NCI-H1435 suggest that the mechanism of the valproic esters may involve intracellular deesterification. This list represents new publications generated from PubMed as of the date shown above.

### design leed platinum: Topics by Science.gov

Articles designated as Platinum Highlights are noteworthy articles selected by Dr. This list represents articles published during the time period shown above, as generated from PubMed.

## Growth, characterization, and properties of ultrathin magnetic films and multilayers : symposium held April 25

This study extends the range of this phenomenon to include Ar.

### Effect of cap

In the oxygen-covered surface, the oxygen is bonded to the Si. The validated Spanish-language version of the ID-Pain questionnaire was used as the criterion variable.

### Magnetic Ultrathin Films, Multilayers and Surfaces

This list represents articles published during the time period shown above, as generated from PubMed.
