

# Thermal Studies in the Lac du Bonnet Batholith at Pinawa, Manitoba.

s.n - Source parameters of seismic events at the Underground Research Laboratory in Manitoba, Canada: Scaling relations for events with moment magnitude smaller than -2

Description: -

- Thermal Studies in the Lac du Bonnet Batholith at Pinawa, Manitoba.

- Eighteenth century -- reel 6938, no. 07.

Technical record (Atomic Energy of Canada Ltd) -- 163 Thermal Studies in the Lac du Bonnet Batholith at Pinawa, Manitoba.

Notes: 1

## The Effects of Temperature And Pressure On the Mechanical Properties of Lac Du Bonnet Grey Granite

The findings from these tests indicate that the extent of the excavation damaged zone is dependent mainly on the magnitude of the radial and tangential boundary stresses, but can also be influenced by thermal-mechanical loading sequence. J Geol 12 1 :39—57.

## Water movement within lac du bonnet batholith as revealed by detailed thermal studies of three closely

To understand the effects of the degree of saturation and stress cycle on the barrier properties of compacted bentonite, gas permeability tests were performed on highly compacted bentonite with different dry densities, water contents and stress cycles.

## The Effects of Temperature And Pressure On the Mechanical Properties of Lac Du Bonnet Grey Granite

Heletz sandstone Israel reactivity is studied by means of CO<sub>2</sub>-rich brine percolation experiments and modeling.

## Pinawa Dam Heritage Park & Pinawa

With reliable records and assurance that the crews were precisely following the intended designs, the blast design engineer was able to progressively refine the designs to achieve better results Kuzyk et al.

## Pinawa Dam Heritage Park & Pinawa

This work was funded by Environment Canada and the Mackenzie GEWEX Study. Meteorological techniques were used to monitor evapotranspiration ET at two sites in a boreal forest drainage basin located in southeastern Manitoba, Canada.
