## An Introduction to Architectural Theory: 1968 to the Present

Hyper-reality propels itself and we are powerless to slow it down. Kleihues, who oversaw a board of architects and planners for new construction, responded with a multifaceted strategy of competitions, exhibitions, and symposia. In retrospect this dissolution would be a happy one, as Rogers first made his mark in a big way in 1971 when — after teaming up with the Italian architect Renzo Piano — he won the competition for the Georges Pompidou Cultural Centre in Paris.

## Marine Engineering Books

The layout was designed by Mario Botta and the exhibition and its monograph — Carlo Scarpa: The Complete Works — were curated and edited by Francesco Dal Co and Giuseppe Mazzariol.

The latter, as we have seen, had ties back to the New York Five and the IAUS, and he was still a persistent critic of the work of Venturi and Scott Brown.
