For gender-related data on COVID-19.

Women and safety and health at work

The rich hoped that by giving freedom and small plots of land to the poorest white settlers they could stifle discontent without decreasing their profits. This indicator belongs to the set of headline indicators used to monitor the Europe 2020 strategy for smart, sustainable and inclusive growth.

Rapid gender assessment of the situation and needs of women in the context of COVID

Scholars eventually recognized this fact, and during the 1970s they began collecting and publishing information about the daily existence and contributions of ordinary European settlers such as servants and other laborers. Across Member States, the gender pay gap varied by 20. Her plea went before the king of England and was granted immediately.
