Ohio Stoneflies

If unaffected by agriculture, riparian zones in southwestern Missouri are typically narrow gallery forests in uplands expanding into valley wide forests downstream. The ubiquitous species, *Malenka californica*, occurs along perennial creeks but is especially abundant at springs.

Stoneflies (Plecoptera) of Nevada

Western counties that included part of the species-rich Carson Range had higher stonefly diversities than expected from their surface areas. A new species of *Swelka* from West Virginia Plecoptera: Cloroperlidae.

CSIRO PUBLISHING

The specimens should be left in for only a few moments. It also is present in Salmon Falls Creek near Jackpot.

The stoneflies (Plecoptera) of Belarus: Fauna and biotopic distribution

Despite these limitations, a number of streams and springs of southern Nevada have been examined for stoneflies, though few were found.

Stonefly

These cerci are actually used in defense and, for some species, prey capture. Stonefly exuviae were handpicked from streamside substrates or found with beating sheets. The wings of Coleoptera are never set.

Identifying freshwater organisms

Adults are present during May—August, the later records being from higher elevations. We report 104 stonefly species from Nevada.
