Economics Essays: Economic Problems of European Union

EU member states are mostly united in their support for the broad European project. We have measured the relatedness of all pairs of exported products and we can look at what products a country is already good at and what are the most related products that they have yet to develop. At the same time, the growth of these countries is beginning to shift the global distribution of power forcing the great powers to come to terms with the reality that they will need to share management of international rules and systems in the coming decades.

The Truth About Europe's Economic Problems

This included big increases in spending on transportation equipment as well as information technology. Output grew at the fastest pace in more than five years and new orders increased at the fastest pace in more than six years.
