Spatial Informatics at the University of Maine

However, some organizations retain spatial data that is proprietary or must be kept confidential due to security or privacy concerns. Information systems are distinct from IT in that an information system has an information technology component that interacts with the processes' components.

UNSD — UN

The international body of Information Systems researchers, the AIS , and its Senior Scholars Forum Subcommittee on Journals 23 April 2007 , proposed a 'basket' of journals that the AIS deems as 'excellent', and nominated: MISQ , ISR , JAIS , JMIS , EJIS , and ISJ. Maria Antonia Brovelli, Politecnico di Milano, Italy Deputy Chair: Prof.

What is a geographic information system (GIS)?

. The paper suggests that while computer science finds the aspect, of shaping, structuring, processing, of central interest, and business and organizational fields find the and aspects of central interest, the Information Systems field can find the of central interest while making links with the aspects of the neighbouring disciplines. Multi-sensor Data Fusion — An Introduction.

Data fusion

In a much more complicated application, marine animal researchers use data fusion to combine animal tracking data with , SST and animal habitat data to examine and understand habitat utilization and animal behavior in reaction to external forces such as weather or water temperature.
