Gas sparged hydrocyclone with foam separating vessel

For reference purposes on this point, tests indicate that wire tension in the range of 1 to 40 pounds per linear inch is recommended. These findings should be extended to other systems. Comprehensive Processing of Copper-Sulfide Ores Resulting in the Production of Rare Metal Concentrates Z.

Proceedings of the XXI International Mineral Processing Congress, July 23

The washing process requires well dispersed hydrophilic ink particles in order to obtain efficient removal of the ink. Role of Particle Microstructure in Comminution L.

Gas sparged hydrocyclone with foam separating vessel

A New Magnetic Separator and Classifier: Case Study P.

Environmentally friendly sugar

The first CFU was introduced to the oil and gas industry at the NCS in 2001. The ink laden froth is removed leaving a recycled de-inked fiber that can be used to produce recycled paper.

US5217573A

Next the deinked fiber may be bleached by the addition of liquid bleach e. The lines indicate continuing polymer chains.
