## **Secondary Plant Products A Comprehensive Treatise**

Exogenous elicitors are recognized by  
receptor proteins in plant membranes.

## **Nitrogen Containing Secondary Plant Products**

Accordingly, the synthesis of reduced  
compounds, such as isoprenoids, phenols  
or alkaloids, is enhanced. The acaricidal  
activity of plant extracts, essential oils and  
secondary compounds from plants have  
been evaluated using bioassays with ticks  
in the larval and adult stages. As such  
another solvent, often ethyl alcohol, which  
only dissolves the fragrant low-molecular  
weight compounds, is used to extract the  
fragrant oil from the concrete.

Notes: Includes bibliographies and indexes.

This edition was published in 1980

Other butterflies have protective coloration that makes them look like Monarch butterflies, thus protecting them from the Blue Jays! A similar substance, balata, is obtained from Mimosops balata.

### **Secondary plant products are of great use in commerce in making**

Saponins boost the immune system, lower the cholesterol levels in the blood and reduce the risk of getting intestinal cancer.

### **Plant Science for Beginners**

Toxins inhibit Na-K ATPases of heart muscle membranes.

### **Stress enhances the synthesis of secondary plant products: the impact of stress**

Tannins are another group of phenolics and they are important in tanning leather. Flavones and flavonols are widely distributed in leaves where they act as feeding deterrents.

### **Plant products and secondary metabolites with acaricide activity against ticks**

Suberin occurs in walls of non-injured root cells as a Casparian Strip in endodermis and exodermis and in bundle sheath cells of grasses. Before sharing your knowledge on this site, please read the following pages: 1.
