## 5 Adolescents Taking Their Place in the World

The rate of injury per hour worked appears almost twice as high for children and adolescents as for adults—about 4. In the absence of federal policy guidance, there have been a number of state and local efforts to create school-to-work transition systems, with an integrated array of services for young people. Wulf are chairman and vice chairman, respectively, of the National Research Council.

## Risks and opportunities : synthesis of studies on adolescence (Book, 1999) [tech.radiozamaneh.com]

Homelessness, Health, and Human Needs 1988 is a study of the delivery of inpatient and outpatient health services to homeless people. It covers emotional reactions and health consequences of bereavement, biological and social science perspectives on its effects, and various approaches to assisting bereaved people.

## Other Reports from the Board on Children, Youth, and Families

A 1993 National Research Council study took a critical look at how families, communities, and other institutions are serving the needs of youth in the United States. The events of this crucial formative phase can shape an individual's life course—and, by extension, an entire society. Many studies show positive links between working during high school and subsequent vocational outcomes, including less unemployment, a longer duration of employment after completing schooling, and higher earnings.

## Risks and Opportunities: Synthesis of Studies on Adolescence

Reproductive Health in Developing Countries: Expanding Dimensions, Building Solutions 1997 assesses the magnitude and severity of reproductive health problems in developing countries, examines the likely costs and effectiveness of interventions to improve reproductive health, and recommends priorities for programs, research, and data collection. It is also a commonly held belief that as parents spend less time with their children, they have less time available to provide guidance and supervision, and fewer opportunities to instill values.

## Risks and Opportunities: Synthesis of Studies on Adolescence

Paying Attention to Children in a Changing Health Care System 1996 summarizes five workshops convened between 1991 and 1994 to explore various aspects of maternal and child health care in an era of health system change. New Findings on Poverty and Child Health and Nutrition 1998 summarizes a workshop at which researchers presented recent findings in the areas of poverty, child health, and nutrition, highlighting key findings relevant to the contemporary debate about welfare and health care policy for the poor, and examining priorities for future research that will yield insights into the effects of welfare reform. Preventing Drug Abuse: What Do We Know? Some teenagers tend to be especially high in sensation-seeking, while others use these behaviors to appear more mature or because of heightened egocentrism.
