List

Inspiration for the landscape design was taken from the Mediterranean climate of Beverly Hills and the archetypal courtyard housing built throughout Los Angeles in the early 1900s. For decades, the iconic art collection assembled by Dr.

Featured Projects — OLIN

Located atop a parking structure, the project provides for 250 additional parking spaces within the transit hub.

List

Conceived as a gallery within a garden and a garden within a gallery, the design honors the original Barnes estate and provides visitors with a highly personal and contemplative experience. As an extension of this purpose the landscape is intended to provide a natural sanctuary for remembrance and reflection.

The landscape encourages ecological diversity by strategically removing invasive woodlands and non-native tree species, which will be replaced with indigenous plantings. The central component of the design being a memorial grove, a ceremonial stand of trees, a sacred space for rest and meditation surrounded by a series of outdoor rooms designed for memorial displays and commemoration. Curvilinear paths guide visitors through the rooms and choreograph a comfortable pace for observation.

This experience provides opportunities for ecological education and offers recreation and leisure spaces for people of all ages. This project is being implemented out of a larger master plan for the Scioto Peninsula in Columbus, developed by MKSK and OLIN.

List

In the central courtyard, employees gather around a uniquely crafted common table to meet and share ideas throughout the day.

Disciplining traffic as part of transportation planning and successfully balancing it with social needs is a difficult task, but one that is successfully addressed at Columbus Circle and can serve as a model for other cities. Entrance into the hotel and residential buildings is celebrated through dynamic seasonal gardens, while paving patterns and materiality navigate the circulation routes for safe passage throughout the site.

List

For decades, Mill River in Stamford, Connecticut was dammed and channelized, choked with pollution and silt buildup, leading to greater flood risk for the surrounding downtown.
