Long

Stages 1 and 2 should have established whether tourism growth is appropriate, manageable at your destination, and how best this might happen. Uptake of big data analytics is accelerating across the UN system with a growing number of UN agencies, funds and programmes implementing and scaling operational applications for development and humanitarian use.

Guide 6: Managing the development of tourism infrastructure

The Strategic Framework defines citizen engagement as the two-way interaction between citizens and governments or the private sector within the scope of WBG interventions. This information was provided by the Government of the United Republic of Tanzania to the fifth session of the United Nations Commission on Sustainable Development.

[PDF] Tourism destination modelling: building a sustainable planning tool for Australian tourism destinations

One of the challenges facing Tanzania is taking necessary legislative steps to ensure sustainable development.

Citizen Engagement

The project is being funded by the Norwegian Agency for Development Cooperation. At least six such boards are now operational. Cultural industries are regarded among the key sectors for economic development.

Agenda 21

The challenge will be ensuring they are sustainable over time, and that clear frameworks are in place to clarify roles and expectations on all sides.

Agenda 21

Informing and receiving feedback from citizens in real time can provide insight into how the crisis is affecting communities and enable real-time course correction in fast evolving situations, as well as post-crisis. When you do have to build new infrastructure, work closely with planning control officers so they understand the need to balance heritage conservation and the demand for development.

Long

SCIENCE Decision-Making Strategies, policies and plans Recognizing the importance of science and its potential impact on sustainable development, the government of Tanzania has put in place a Higher Education Policy to provide the direction and guidance to stakeholders and service providers. The following programme areas were identified as requiring an integrated legal framework: promotion of sustainable human settlement development; integrated approach to the planning and management of land resources; combating deforestation, desertification and drought; conservation of biodiversity; protection of quality and supply of fresh water resources; environmental pollution; protection of the atmosphere; and promoting the role of women in sustainable and equitable development. Many destinations have high room occupancy in peak season and cannot without new hotels, etc.
