What are Cushing's Syndrome and Cushing's Disease?

This table lists symptoms that people with this disease may have.

Cushing Syndrome

Cushing's syndrome is caused by long-term exposure of the body's tissues to cortisol, a hormone that is naturally produced by the.

What are Cushing's Syndrome and Cushing's Disease?

Other side effects include: headache, nausea, irregular periods, impotence, and decreased libido. High cortisol levels also cause immune disruptions; this hormone leads to a decrease in lymphocyte levels and increases the neutrophils. With primary pigmented micronodular adrenal disease, children or young adults develop small cortisol-producing tumors of the adrenal glands.

What are Cushing's Syndrome and Cushing's Disease?

Your doctor will first want to rule out other conditions.

What are Cushing's Syndrome and Cushing's Disease?

Adrenocortical carcinomas, or adrenal cancers, are the least common cause of Cushing's syndrome.
