C18

The assessments identified the following opportunities for promoting drought resilience in the HOA region: 1 Existence of IGAD to establish regional and international mechanisms for cooperation to address cross-border drought issues; 2 The IDDRSI framework which supports drought resilience and sustainable development with political support and commitment at regional and national level; 3 Availability of relevant national policies, plans and strategies; 4 Existence of national implementing and coordination structures; 5 Accumulated experiences in implementing related programs, projects and initiatives; and 6 Observed interest of donors to support national and regional initiatives to enhance drought resilience. Several of the commissioned papers concern grassroots conservation activities; one of these, Grassroots Conservation of Biological Diversity in the United States: Background Paper no. See the section for more information.

Inventory of the Department of Forestry Records

Discovery and Chatham : under the command of Captain George Vancouver, to the northwest coast of America, February 10, 1791 to June 30, 1793. Each region is in the charge of a Regional Director, as follows: Region I, Miner R.

Arthur Franklin Raper Papers, 1910

Jahrhundert: Studien und Kommentierte Gattungsbibliographie.

National Conservation Activities

The wildlife policies of the Service were recognized by the Biological Survey and subscribed to in the new inter-bureau relationships. Durham, NC: Duke University Press for American Association for the Advancement of Science , 1988.
