'South Kensington' and the Science and Art Department

Henry Mayhew, English social commentator and founder of Punch, described how on shilling days, visitors pressed two and three deep to watch the machinery in motion. This opened in 1851 and, in the same year, De La Beche and many others with landed or professional interests flooded the government with memoranda urging the establishment of a mining school to be attached to the museum.

It is interesting to note the way in which exhibits from the colonies were arranged to promote them as vast areas of untapped wealth and resources. A Phase in Adult Education.

A Short History of Technical Education

It is also not to say that what was perceived by most as a failure revealed as much about the critics as it did about at least some of the raw material evidence. The former department was assisted by an Advisory Council on Plant and Animal Products and a number of special consultative committees. Prince Albert and Henry Cole agreed that Hyde Park would be best for an exhibition as early as July 1849.

Readers from all over the world, such as a Dr Merrell, a homeopathic doctor from Iowa, continued to send him. South of a main cross-avenue aligned on Queen's Gate Terrace, Cole placed his institutions right up to the street frontages, with numerous projecting pavilions hardly at all stressed, although arranged symmetrically. However, while these interests dominated the culture it is clear that they had to merge with other interests.

The Great Exhibition 1851

In order to get in the men and a few women had to give their name and address and give proof of their occupation.

Imperial College London

It was though, perhaps too much to ask the public not to compare events and not to seek an ever more ambitious upcoming one. There there has been long a growing tendency to combine scientific and practical education in industry with the literary instruction which must always form the basis of any scientific education at all.
