The practice of sensible people shows the advantage of the latter course; and here, as elsewhere, science has simply followed and improved upon common sense. One kind, by way of distinction, is called fluviatile, another slender-handed, another Dauric, from the region in which it lives; and these double names are rendered by *Astacus fluviatilis*, *Astacus leptodactylus*, and *Astacus dauricus*; and thus we have a nomenclature which is exceedingly simple in principle, and free from confusion in practice.
