Organophosphate Poisoning

Abstract Objectives—To derive a method for retrospectively estimating cumulative exposure to organophosphate OP pesticides among a cross section of United Kingdom sheep dippers, as part of a wider epidemiological study of neurological abnormality within this group of workers. Clinical validation of methods of diagnosis of neuropathy in a field study of United Kingdom sheep dippers.

Estimation of cumulative exposure to organophosphate sheep dips in a study of chronic neurological health effects among United Kingdom sheep dippers

For example, it may be that the social isolation or the financial pressures often associated with sheep farming may be predominant.
