## Energy Division Projects

Study for assessing the potential of RE resources that are available to the State. December 3, 2021 The purpose of the project is to work on a scoping project to design UK-India Electric Mobility Accelerator Awareness Campaign which can support delivery of India's ambition on adoption of electric mobility, thereby contributing to cleaner air in cities, achieving energy security and creating new jobs both in India and in the UK. January 27, 2021 The objective of this study will be to conduct an independent monitoring of mechanised road sweeping MRS operation in North Delhi Municipal Corporation area as a third party and identify gaps and deficiencies in the existing system and suggest possible corrective actions.

## An integrated rural energy system in Sri Lanka

December 4, 2021 The main objective of this project is to support a core team in the World Bank to develop a set of technical activities in order to deliver the following outputs: i assessment of the costs of deforestation and degradation, in the mountain forests and mangroves; and ii ecosystem valuation of the mountain forests, as well as the assessment of the provisioning of key ecosystem services. This program will use innovative educational approaches to help school students of grade 6-8, i.

## Energy Division Projects

January 22, 2021 Developing green cover at the red mud and convert the red mud deposits, which is inhospitable for plants, to a substrate which will allow them to grow and develop by improving its physical and physico-chemical conditions, and removing the inhibiting substances by means of low-cost additives and treatments.

## Energy Division Projects

December 16, 2020 The overall objective of the consultancy services is to facilitate GIZ and the project partners to take a decision on the scope of application of environmental technologies for reduction of air pollution. The overall objectives are to: December 8, 2021 The following activities in pursuit of the Grant objectives: a.

### **An integrated rural energy system in Sri Lanka**

This chapter discusses an integrated rural energy system in Sri Lanka.

### **Energy Division Projects**

Literature review of State's current policy and regulatory framework, present status of electricity supply and demand including status on RE capacity, economic growth patterns, consumer types. .
