## London

This release provides counts of the total number of parliamentary electors for all parliamentary constituencies in the UK. Figure 5 shows the broad age structures of the four constituent countries of the UK in 2011.

## Topic: Demographics

.

## United Kingdom constituencies

Over the last 5 years, the number of local government electors in England has fallen by an average of 0. In Wales, the area with the largest fall was Torfaen at 4.

## KS204EW (Country of birth)

The changes in the number of local government districts in Northern Ireland in April 2015 prevent comparisons in the size of the local government electorate by local government area being made with the previous year. Providing a detailed socioeconomic picture, it guides governments in framing policies and allocating funds for them.

## Dataset Search

Further information from Cabinet Office on the is available from the. Figures here are for Greater London in its 2001 boundaries.

## Census results

Main article: The term Greater London has been and still is used to describe different areas in governance, statistics, history and common parlance. In order to protect against disclosure of personal information from the 2011 Census, there has been swapping of records in the Census database between different geographic areas, and so some counts will be affected.

## **2011 Census**

Decisions are taken every day using census statistics.
