### Aspects of phonetics and phonology in pronunciation

Marginal and non-universal phonemes are in parentheses. Strictly speaking, Hindustani, like most other Indian languages, is rather a.

### ASPECTS OF HINDI PHONOLOGY

Suprasegmental features Hindi-Urdu has a stress accent, but it is not so important as in English. Organization: The first chapter deals with the segments of Hindi that need to be recognized as phonemes, the problem of certain segments that occur only in loans, the features used, including some modifications of the conventional Chomsky and Halle features, and a few segment structure conditions of Hindi. In a grammar of this type, as long as the description notes the existing regularities or patterns in the sound system of the language and states these patterns as generally as possible, it will be justified.

### ASPECTS OF HINDI PHONOLOGY

Despite this, the Hindi-Urdu vowel system is quite similar to that of English, in contrast to the consonants. The result of this is the sing-song effect that English spoken by Hindi learners often has on native-English speakers. In this case, the word as a whole is given emphasis, often within a sentence.

### Hindustani phonology

The intonation is also important when it comes to the different kinds of sentences. The model used in this work is that of generative phonology, with modifications suggested throughout.

### ASPECTS OF HINDI PHONOLOGY

In most situations, the allophony is , i. Linguistically and in its everyday spoken form Hindi is virtually identical to Urdu, which is the national language of Pakistan.

### Hindi

As to be expected, these differences make it difficult for Hindi learners to get the articles right in English. European Studies Research Institute, University of Salford Press. Phonology: In comparison with English Hindi has approximately half as many vowels and twice as many consonants.
