December 10, 2020 Regional Transportation Council

A case study of two North American cities Los Angeles County and Toronto, Canada estimated that 30%—45% of the population in these urban areas lives within 500 meters of a highway or 50—100 meters of a major road 5. The deep economic downturn caused by the coronavirus pandemic has only exacerbated this reality. While internal combustion engines operate more efficiently when driving than idling or moving through stop-and-go traffic, building new highway capacity leads to more overall driving and emissions.

Problems We Solve

Robots driving in a linear formation where each of the followers estimate the path of its leader and drive that path using trajectory tracking control. Even though the pandemic and its aftermath could temporarily suppress emissions, as coal and oil bear the brunt of the reduction in demand, it does not move India any closer to its long-term sustainable development goals.

EXPANDING METROPOLITAN HIGHWAYS: IMPLICATIONS FOR AIR QUALITY AND ENERGY USE. APPENDIX E: MINORITY STATEMENT OF MICHAEL A. REPLOGLE

These devices can be frequency and voltage control, peak shaving, and perpetuity of energy supply devices.

CDC

The Transportation and Health Tool focuses on measures to improve air quality by developing cleaner travel options.
