PlantRight

Which vegetables should you plant next to each other? Swainsona katjarra, a new species from Western Australia.

PlantRight

The Christian worldview dominated European thought at the time. There are many neutral plants that can be used to fill space between friends and foes. You may later find that there are even more plants that are compatible or non compatible within these groups.

PlantRight

Companion planting allows the plants to benefit from being able to help each other deter pests, attract beneficial insects, helping to boost the growth of the plants by which they have been planted. Do them as much good you can. Retail In a retail space, plants need to be as well styled and as beautiful as the products that are being sold.

Why Plant Trees?

If you would like to know more about companion planting here are some resources. Plants inspire creativity, increase productivity, and purify the air.

Send a Plant: Best Selling Plants from FTD

Pick them off and drop in soapy water or feed them to chickens. This plant is native to Central and South America where it grows in abundance in open tropical forest edges.
