5 tough questions your managers want to ask, but don't

This would include treating the particular patient or another patient as well as coordination or management of healthcare, consultations, and referrals.

Older Americans are on the front line of the student debt crisis

Virginia became the center of the gun-control debate years before tens of thousands of gun-rights supporters amassed on the steps of the state capitol earlier this month. But the reality for many borrowers is very different.

On the Coronavirus Front Line: Legal Issues for Healthcare Providers

Certain objectives are harder to meet than you had hoped.

On the Coronavirus Front Line: Legal Issues for Healthcare Providers

Given the root causes uncovered, what does that mean for behavior or plan changes? Please consult with your legal counsel for guidance. Over the past few weeks, operating rooms have been transformed into ICUs, physicians of all backgrounds have been drafted into emergency room work, and two of her colleagues became ICU patients. The CMS memorandum on survey and certification outlines exactly how the agency will prioritize conducting facility inspections and also discusses how such inspections will be conducted with COVID-19 precautions in mind.

5 tough questions your managers want to ask, but don't

An authorization is recommended for the provider to announce to the media or the public at large specific identifying information about a particular patient. Specifically, what should we do next now that we know what we know? Many CBAs also have provisions that govern time off paid and unpaid in the event of an illness, emergency, or other prohibition on reporting to a usual and customary place of work. Here are four steps to conduct an effective debriefing: 1.

Opinion

Employees with symptoms of respiratory illness, even with no known exposure to COVID-19, should be required to stay home for a period after they are free of fever 100.
