Nationalism and Social Policy: The Politics of Territorial Solidarity

The key topics of this proposal: inequality, prosperity, and environmental change are at the forefront of contemporary policy considerations in rural America. Rural Sociology, 73, 4, 631-659.

The Sociology of Social Inequality

We will produce policy-related issue briefs disseminated through a variety of outlets to make research results quickly and easily accessible to policy makers and stakeholders. Additionally, amongst male respondents, community conduct norms were found to be a stronger predictor of aggression than the effect of conduct norms and peers. This is the main pattern of inequality in income and wealth.

Goethe

As a result, they conclude that the important effect of school attachment in the lives of young people should not be minimized.

Inequality After the Transition

Cambridge, UK, and New York, NY, USA: Cambridge University Press. The multi-state approach allows each researcher to take advantage of the unique and diverse skills of all committee members and their affiliated institutions, including departments and population centers at Cornell, Connecticut, Kansas State, Michigan Tech, Mississippi State, Missouri, Montana, New Hampshire, Texas-San Antonio, Utah State, Wisconsin, and Middlebury College.

Health inequality implications from a qualitative study of experiences of poverty stigma in Scotland

At best, the extant literature on this aspect of social control demonstrates mixed findings on the role of religion as a mechanism of social control

against delinquency. The series is published in association with the European Consortium for Political Research. London: SAGE in association with the United Nations Research Institute for Social Development.

Goethe

Journal of Balkan and Near Eastern Studies, 201, 31-48.

9780471798675

Findings — The picture emerging is mixed and there is evidence for strong decentralisation where policy instruments allow for considerable local room to manoeuvre.

9780471798675

The authors found that young people who reported feeling a stronger connection with their parents were less likely to commit violent offences with a weapon Henrich et al.
